DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-11, 21-22, drawn to apparatus, classified in class 604, subclass
 423.
- II. Claims 12-14, drawn to method of use, classified in class 604, subclass 890.1.

The inventions are distinct, each from the other because of the following reasons:

- 1. Inventions Group I and Group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case Group II lacks the suture tab in Group I hence the method described in Group II is not the only way to utilize the apparatus in Group I.
- 2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant must also elect a Species:

3. This application contains claims directed to the following patentably distinct species of the claimed invention:

Application/Control Number: 10/055,584

Art Unit: 3763

Species A- as stated by the applicant in paragraph 0037 an embodiment having a coated drug core that is coated with coating.

Species B- as stated by the applicant in paragraph 0041 another embodiment where the device includes an impermeable cup made of silicone with an attached PVA suture tab

Species C- as stated by the applicant in paragraph 0045, another aspect of the invention entails a sustained releases drug device.

Species E- as stated by the applicant in paragraph 0068 the drug core being a solid tablet.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no pending claims are considered generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Application/Control Number: 10/055,584

Art Unit: 3763

Page 4

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roz Maiorino whose telephone number is 703-305-2336. The examiner can normally be reached on 8:30am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor. Brian Casler can be reached on 703-308-3552

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0858.
